

EcoIntense at the trade fair A+A

Software company presents latest features of the HSE software solution in hall 6, booth C37

Berlin, September 1, 2015 – EcoIntense showcases the new software release EcoWebDesk 8.0 at the international trade fair A+A – Safety, Security and Health at Work – in Düsseldorf, Germany. Visitors can get an insight into the latest software updates from October 27 to 30 in hall 6, booth C37. With the HSE software EcoWebDesk 8.0, users can now generate operational instructions and risk assessments even easier, especially with regard to *Betriebsicherheitsverordnung* (Ordinance on Industrial Safety and Health).

There are two ways to experience the advantages of the web-based software live at the booth. Firstly, visitors can complete an online safety instruction at the touchscreen terminal to find out how conveniently employees and third parties can be trained online nowadays. Secondly, they can use a barcode scanner to see how quickly the software displays all relevant information about hazardous materials contained in the barcode. For example, upon reading the barcode, application areas, hazard symbols and safety data sheets appear instantly on the screen.

EcoWebDesk® is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management. In EcoWebDesk key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is fully compliant with DIN EN ISO 14001, 50001 and OHSAS 18001, officially confirmed by the global DEKRA Group. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany) as well as in Houston, Texas (USA).
